(54) Title: METHOD AND APPARATUS OF RESOURCE ACCESS SYNCHRONIZATION IN A BASIC INPUT AND OUTPUT SYSTEM OF A COMPUTER SYSTEM

(57) Abstract: A basic input and output system (BIOS) for a computer system includes a main engine to call and run routines. Some of the routines require resource accesses. A synchronization module is provided to synchronize the resource accesses. The synchronization module allows concurrent resource accesses to different resources. A method of synchronizing resource accesses in a basic input and output system of a computer system is also described.
